

Make getting paid easy with SMART e-INVOICING

Getting paid faster and easier has never been more important. Delayed mail service means invoices take longer to reach your customers, and their checks longer to reach you. Digital, streamlined invoice delivery eliminates paper and manual processes, and even includes secure payment links so customers can make e-payments for an efficient, low cost order-to-cash workflow.

Reduces cost significantly by eliminating mail time, paper and manual processes

Accelerates cash flow with real-time bill delivery, digital exception handling, and embedded payment link

Provides E2E A/R transparency, real-time tracking and streamlined reporting

Implementation was fast, easy and one of the best experiences we've ever had.

Pete Chrobak, CFO, Duncan-Parnell, Inc.

Get paid faster, easier and at less cost with value added features.

- ✓ Embedded payment link allows customers to pay with credit card, debit card, or ACH/eCheck
- ✓ Built-in fraud management and tokenization on all transactions
- ✓ Capability to auto-apply payments to oldest invoices
- ✓ Securely stores customer payment info for future transactions
- ✓ Available automation of compliant surcharges on credit card payments

We saw real savings immediately. Implementation was excellent and the team makes us feel like we are their number one client.

Devin Watts, CFO, M&A Supply Company
